HCS-100

A quick and simple system using compressed air to clean hose. The tool is delivered with two coned nozzles, one for hoses from 3/16" to 1" and the other for 1" to 2". The hose is pressed against the nozzle opening a valve to allow the compressed air to clean the hose tube.

Replacement Part:

- 9036001 Small Nozzle
- 9036002 Large Nozzle

Air Cleaning Systems

UC-EL-8-DP

The projectile launcher can quickly and effectively clean hose, tubes and pipes reducing the need for current costly cleaning methods. It works by firing a foam pellet/projectile that is approximately 20% larger than the internal diameter of the hose, tube or pipe to be cleaned. When propelled through the line, the foam projectile cleans by wiping the internal surface forcing the contamination out of the open end.

- Projectile launcher
- Includes 8 nozzles for cleaning up to 1-1/4" hose/tube
- Includes 11 bags of projectiles from 7mm to 40mm
- Carrying case
